

Agricultural Herbicide

# A proven option for reliable residual and burndown control in sorghum

Using preemergence herbicides such as Linex 4L as a foundation to provide early season residual control of grasses and broadleaf weeds results in maximum yields and cleaner fields at harvest.

### Unique benefits of Linex 4L

Linex 4L is a photosystem II (PSII) inhibiting herbicide that provides effective residual control of several key small-seeded broadleaf weeds. Linex 4L acts at a different binding site from many other PSII herbicides (like atrazine), and can therefore control triazine-resistant lambsquarters and pigweed making it an effective addition to many sorghum programs.

### **Application Recommendation**

Make a single preemergence application of Linex 4L tank mixed with a herbicide registered for the same use. Apply after planting but before crop emerges.

Soil Type	1-2% OM Rate in Pints	2-4% OM Rate in Pints	
Sandy loam	0.625 – 1.25	1 – 1.5	
Loam, silt loam, silt, sandy clay, sandy clay loam	1.0 – 1.5	1 – 2	
Plant seed at least 1 inch deep on flat or raised seedbeds only as injury to the crop may result.			

**Note:** 1. Do not apply over the top of emerged sorghum. 2. Do not apply within 75 days of harvest. 3. Do not graze or feed plants to livestock within 3 months after directed postemergence application. 4. For directions on the use of Linex in a directed post-emergence application, consult the Linex Specimen Label (novasource.com).

#### **Weed Control**

Seedling weeds controlled with burndown applications of Linex 4L					
Broadleaf weeds		Grasses			
Aster, white heath* Beggarweed, Florida Buckwheat, wild Carpetweed Chickweed: common, mouseear* Cocklebur, common Dayflower, common Deadnettle <sup>†*</sup> Dogfennel Evening-primrose, cutleaf*	Fiddleneck Goosefoot, nettleleaf Groundsel Henbit* Knawel Lambsquarters Morningglory, annual Mustard Pennycress* Pigweed Purslane, common Pusley, Florida	Ragweed, common Sesbania Shepherd's-purse* Sicklepod Sida, prickly Smartweed, Pennsylvania Speedwell*: corn, field, purslane Velvetleaf Wallflower, bushy*	Barnyardgrass (watergrass) Canarygrass Crabgrass Foxtail (including giant) Fescue, rattail Goosegrass Panicum: fall, Texas Ryegrass, annual Signalgrass		

† Suppression \* Requires the addition of 1 pint per acre 2,4-D LVE.

Agricultural Herbicide

## A proven option for reliable residual and burndown control in glyphosate-tolerant soybeans

Growers are discovering that they need to use a preemergence herbicide such as Linex 4L as a foundation for their postemergence program. Early season residual control of grasses and broadleaf weeds by Linex 4L allows growers more flexibility to target their postemergence herbicide applications for maximum yields and cleaner fields at harvest.

### Unique benefits of Linex 4L

A preemergence application of Linex 4L delivers effective residual control in all types of soybean seed systems including Roundup Ready®/STS® stacked trait soybeans and conventional soybeans.

Linex 4L is a photosystem II (PSII) inhibiting herbicide that provides effective residual control of several key small-seeded broadleaf weeds. Linex 4L acts at a different binding site from many other PSII herbicides (like atrazine), and can therefore control triazine-resistant lambsquarters and pigweed, making Linex 4L an effective addition to many soybean programs on 1 percent to 3 percent organic matter soils.

### Conventional or minimum tillage

Linex 4L applied preemergence up to 30 days prior to soybean planting and before soybean emergence provides control or suppression of many key grasses and broadleaf weeds, to give your glyphosate-tolerant soybeans a strong start in the spring. Ask your local crop consultant or NovaSource representative for specific recommendations.

#### No-till soybeans

Linex 4L is recommended as a tank mix foundation herbicide for no-till soybean production. The addition of Canopy®, Synchrony® XP or 2,4-D LVE will improve burndown and residual control in glyphosate-tolerant soybeans.

Important: Always read the label before buying and follow label instructions when using this product. Atrazine is a restricted-use pesticide.

CONDITIONS OF SALE - LIMITED WARRANTY AND LIMITATIONS OF LIABILITY AND REMEDIES

Failure to strictly follow label directions may cause injury to crops, animals, man or the environment. Tessenderlo Kerley, Inc.
